

VANADIAN ENERGY COMMENCES DRILLING ON HUZYK CREEK PROPERTY

Vancouver, Canada (April 01, 2019) – Vanadian Energy Corp. (the "Company") (TSXV: VEC), is pleased to announce the commencement of an exploration diamond drilling program on the Huzyk Creek Vanadium Property (the "Property") to follow up on a broad zone of vanadium mineralization encountered in a historic drill hole.

The initial drill hole will twin historic drill hole NIM-19 which encountered a broad zone of vanadium mineralization. Previous sampling in NIM-19 returned a total of 68 meters @ 0.14% V₂O₅ hosted within a sequence of graphitic meta-sediments associated with sulphides. Individual V₂O₅ values ranging from 0.04% to 0.6% over widths ranging from 0.3 to 1.25 meters were noted within this mineralized interval. Mineralization appears to be open down hole, with the new drilling planned to determine the width potential of the vanadium mineralization.

No other known historic drill holes have completed on this mineralized zone. At this time the strike, dip and the lateral extent of mineralization is not known. The Company plans to complete additional drilling along strike to determine the potential for additional vanadium mineralization along the geophysical conductor.

Under the terms of the Agreement with Rocas del Norte, the Company can earn an initial 49% interest in the Property by making staged payments over 3 years totalling \$215,000 (\$25,000 upon signing), issuing \$180,000 of the Company's shares and completing \$2,500,000 of exploration on the Property.

The Company can earn an additional 21% interest with a cash payment of \$125,000 and the issuance of \$50,000 of the Company's common shares to the Vendor, along with completing an additional \$2,225,000 of exploration on the Property which will include a preliminary economic assessment (PEA) study.

The Company can earn the remaining 30% interest in the Property, for a total 100% interest, in the Huzyk Creek Project by completing a pre-feasibility study within 24 months of the 4th anniversary of the Agreement, along with a payment of \$500,000 to the Vendor.

A National Instrument 43-101 geological report for the Huzyk Creek Property entitled 'Geological Report on the Huzyk Creek Property, Ponton Manitoba Region' has been prepared in connection with the Agreement and has been filed on SEDAR at www.sedar.com.

Marc Simpson, P.Geo., the Company's President, CEO and Director is the Qualified Person that has reviewed and approved the contents of this news release on behalf of the Company.

The Company also announces that it has granted an aggregate of 1,495,000 incentive stock options to directors, officers and consultants at a price of \$0.055 per share, exercisable for a period of 10 years, subject to TSX-V approval.

ABOUT VANADIAN ENERGY CORP.

Vanadian Energy Corporation is an energy minerals focused company headed by an experienced team, well versed in mineral exploration and capital markets. The company is focused on the strategic acquisition, exploration, and development of high quality energy mineral properties in Canada and around the world. Vanadian Energy Corporation is building a leading vanadium focused resource company.
